

Engineering Services

Engineering services is a core competency and a critical component of Segue's complete manufacturing solution. Our dedicated engineers have worked with numerous clients in the concept, design and development of components. Segue's capabilities cover the entire product life cycle including; initial design, alpha/beta prototyping and testing, production support, reliability improvements, and product obsolescence.

Segue's Engineering Services include:

- Prototype design & 3D modeling
- CAD/CAM design & manufacturing documentation
- Tool & fixture design
- Engineer and maintain mature products
 - Engineering Change Order (ECO) implementation & support
 - CAD conversions
 - Engineer to RoHS compliance
 - Cost reduction programs
 - Reliability upgrades

Software Platforms:

- AutoCAD
- Pro/E
- Teksoft
- SolidWorks
- CATIA
- ALTIUM
