

Supply Chain Management & Global Sourcing

Segue offers a complete low-cost solution for supply chain management. Components are sourced from our large database of qualified suppliers. Segue matches customer requirements and demand profile to locate the lowest-cost solution. We offer a wide range of services that can be tailored to meet or exceed our customer's needs at any level of assembly. Segue manages the entire supply chain from the point-of-origin to point-of-consumption. We can deliver finished goods, sub-assemblies and/or components directly to your factory floor or to your customer's dock in order to maximize inventory turns and support your JIT/DFT implementation.

Segue provides:

- Global sourcing
- Complete demand management
- Procurement and logistics
- Vendor managed inventory
- Local integration and delivery

Benefits:

- Reduced design cost
- Faster time to market
- Lower product cost
